Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

1. **Team gathering**
   Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
2. **Set the goal**
   Think about the problem you'll be focusing on solving in the brainstorming session.
3. **Learn how to use the facilitation tools**
   Use the Frames, Sticky notes in Miro kanban board to run a happy and productive session.

Open editor →

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

FOCUS AREA
How might we (your problem statement)?

Key rules of brainstorming
To run an smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can select a sticky note and hit the "+" button to create more sticky notes quickly.

Voting

Votes: 0 votes

Priorities: 0/4 votes

Priorities: 0 votes

Assign/Edit

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP
Add relevant tags to any sticky note so you can easily find them anyone and quickly sort them into groups.

Login

Notify

Application Tracking

Eligibity Prediction

Benefits

Multiple users can login at the same time

User get notified about their application status.

User can track all its moves.

Will provide accurate results based on entered info correct

Free of Cost

Any number of users can create account

Notification about current notifications

Progress of the application gets shown on the dashboard system.

The model which was created is quite the result of the student's academic performance and work ethic

Text analytics tool helps to analyze the resume quickly and provide the result in minutes.

Will suggest high security passwords

Maintaining a profile for each user

The results from the predictor appears in less more than 30 seconds.

No training is required to use the app.

This model will help the students to make informed decisions regarding their future universities.

Avoids Data redundancy and inconsistency

Candidates will get the results immediately

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes
